

ProjectForge

Private, secure, customer-controlled collaborative software development environment

Forge.mil improves the ability of the DoD to rapidly deliver dependable software, services & systems in support of net-centric operations & warfare.

OVERVIEW

ProjectForge is a member of the Forge.mil family of services offered by the Defense Information Systems Agency (DISA) to the Department of Defense (DoD) and Intelligence Community (IC). It provides teams with their own **secure, private, web-based collaborative software development environment** offered as an on-demand service. The application underlying ProjectForge is **CAC/PKI enabled, fully certified, accredited and securely hosted within DISA's Enterprise Computing Center (DECC).**

CAPABILITIES

- Source code/lifecycle management with industry-standard Subversion (SVN) and Git
- Track issues, requirements, tasks & other items with integrated, flexible tracking
- Multiple development methodology support (Agile/Waterfall) in a single interface
- Create multiple projects for use by the project or program
- Distributed team collaboration support via forums, wikis & documents
- All capabilities integrated seamlessly together, including association of items
- Administrative functions that provide enhanced role-based access control over project artifacts
- Operational support provided by DISA 24x7x365

BENEFITS

FOR DEVELOPERS

- Access a full featured development platform over the web or directly from your IDE
- Conduct fewer meetings and administration activities when collaboration is part of everyday development
- Link to continuous integration servers & provision build and test servers in the cloud whenever you need them

FOR MANAGERS

- Accelerate new project start-up
- Access project assets securely
- Enhance team productivity & collaboration
- Improve visibility into project status
- Reduce management & administrative overhead
- Access critical team assets via the web or your Microsoft Windows desktop

FOR EXECUTIVES

- Eliminate cost/time to certify & accredit development environment
- Consolidate & centralize to reduce administration, licensing, & infrastructure costs
- Establish governance & regulatory compliance
- Improve predictability of the development organization
